REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the closest prior art is considered to include both Alperine et al and Darolia et al. However, Alperine et al clearly requires aluminum to be contained in the deposited particles, and thus, teaches away from depositing particles not including aluminum. Darolia et al fails to teach a subsequent step of aluminizing the article, and in fact teaches away from subsequent aluminizing at col. 6, lines 26-29 by stating that the platinum-alloy bond coat (i.e.-non-aluminized coating) performs significantly better than a platinum-aluminide bond coat.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: In accordance with 37 CFR 1.42, when an inventor is dead, as is indicated by Applicants' declaration, the declaration must be signed by a legal representative of the deceased inventor. See MPEP 409 for more details. Applicants' are required to submit a new declaration including the signature of the legal representative of the deceased

inventor or submit a statement under 37 CFR 1.47 that such cannot be found after a diligent search.
